

Every social system demands the ap-
pliance of a set of common values. Civ-
ic values are necessary for social be-
havior. Democratic communities de-
mand the acceptance of and compli-
ance with rules and laws which help
everybody to be accepted amongst
others, support togetherness, and sta-
bilize social life.

CITI-VAL PROJECT

Application n° 2016-1-
FR01-KA204-023961

PROJECT

The prison houses a fragile community, often young, vulnerable and easily susceptible people (in the sense of manipulation/radicalization). An educative process may help to build self-awareness and self-esteem and therefore contribute to fighting recidivism.

The project focuses on detainees (Male / Female – Minors /Adults), irrespective of the length of their incarceration. Priority will be given to younger prisoners, the less educated ones and/or inmates identified as being „at risk” and in search of deviant forma as protection (e.g. Networks of influence, „siren song”...). Priority will be given to – especially young – prisoners who don't have a success story to tell and whose future prospects don't look good, which makes a criminal career likely.

Through this project, the concept of education for citizenship will be implemented by involving many stakeholders in educational prison work (prison staff, teachers / trainers, counselors for integration, volunteers ...). All disciplines (history, geography, philosophy, foreign languages, sports) may be concerned with this approach and invest in the development of innovative pedagogies.

Two major productions will be performed:

1. An overview of inspiring practices from existing educational activities focusing on the acquisition of civic values and already developed in penal institutions as
 - ⇒ Inspiring contents to share
 - ⇒ Obstacles to identify and overcome
 - ⇒ Mistakes to avoid
2. A – 62 hour-long – training and teaching module about civic values with a pedagogical toolbox including a methodological guide to be used in prison as well as by stakeholders involved in training population at risk in some poverty-stricken areas.
